## PROFESSIONAL EXPERIENCE

### PRODUCT MANAGER

Pyx | 2019-Present

Pyx is a mobile application aimed at providing real-time solutions to the medicaid population. Oversaw product development for the mobile application. Rolled out adolescent-focused application to populations across the nation. Provided content oversight to engineering, marketing and sales teams. Prioritized features in the application across business and engineering needs. Involved in day-to-day development of the application to achieve implementation deadlines.

### CLINICAL SUPERVISOR

Pathways of Arizona, Tucson, AZ | 2015 – 2018

Pathways is an outpatient mental health provider for children and adults. Provided clinical and administrative supervision to a team of clinicians in an outpatient setting. Created and implemented new clinical programs to meet the needs of the community, including rapid response program, residential authorization, and clinical documentation process errors. Collaborated with CEO and leadership team to determine direction of outpatient clinic in the areas of staff productivity, agency training, staff morale, and service provision. Coordinated and addressed day-to-day requests from system partners and community stakeholders, such as schools, juvenile detention, inpatient hospitals, and other behavioral health agencies.

## VOLUNTEER EXPERIENCE

### Mentor

LifeStep Mentor Program | 2012

Mentored an at-risk child in the local community. Provided skills intervention and weekly outings to provide respite to the child. Attended weekly consulting meetings with other mentors.
